PROFESSIONAL SUMMARY

Results-driven and passionate IT professional with 5+ years of experience in software development, system optimization, and process improvement. Skilled in designing, developing, and maintaining scalable financial solutions using modern frameworks and technologies. Skilled at troubleshooting, debugging and enhancing existing systems to maximize performance and reliability. Demonstrates excellent collaboration through active participation in code reviews, with a commitment to delivering high-quality, secure, and innovative software solutions on time. Eager to contribute technical expertise and a growth mindset to support organizational objectives and advance personal and professional development.

TECHNICAL SKILLS

- **Programming:** Python, JavaScript , HTML, CSS,
- **Frameworks & Technologies:** Django, Flask, Node.js/Express.js, React.js, Odoo, APIs, Microservices Architecture
- **Testing & Quality:** Unit testing, functional and performance testing, automated tests (pytest, Selenium), test-driven development
- **DevOps & CI/CD:** Git, GitHub Actions, experience with automated deployments, release and change management, cloud deployments (AWS EC2, S3, Elastic Beanstalk)
- **Process & Methodologies:** Agile, Scrum, code reviews, ITIL standards, documentation
- **Databases:** PostgreSQL, MySQL, SQLite, MongoDB; experience ensuring data integrity and optimization
- **Cloud & Containerization:** AWS, Docker, introductory knowledge of Kubernetes

- **Security:** API authentication, best practices in secure API development
- **APIs:** Design, integration, and documentation of APIs; API security (OAuth2, Google OAuth); Third-party API integration
- **Other:** Task automation (cron jobs), analytical and problem-solving skills, strong communication and collaboration

PROFESSIONAL EXPERIENCE

Software Developer & IT Support | Dry Associates

July 2022 - Present

- Actively participated in the planning and design of updates and features, collaborating closely with management to meet evolving business and regulatory requirements.
- Built and implemented an internal IT ticketing system using Django, streamlining issue reporting and tracking, increasing user confidence in IT, and reducing average resolution time by 30%.
- Integrated third-party APIs and implemented secure authentication (OAuth2), enhancing system capabilities and data protection.
- Supported CI/CD automation and managed releases using Git and GitHub Actions, ensuring smooth deployments and adherence to release/change management best practices.
- Collaborated with cross-functional teams to deliver projects on time and in line with requirements.
- Led and contributed to internal process improvement initiatives, always striving for higher quality delivery and continuous improvement.
- Conducted comprehensive software testing (functional, performance, and monitoring) to meet both functional and non-functional requirements, and ensure zero major defects in releases.
- Troubleshooting, debugged, and optimized existing systems, leading to increased stability and service availability.
- Recommended and executed process and system improvements, including automation of routine tasks with cron jobs and adoption of newer libraries, in accordance with software development and ITIL standards.
- Developed automated data visualizations and dashboards to support business analysis and reporting needs.
- Maintained comprehensive documentation for software functionality, releases, and upgrades.
- Conducted regular database maintenance and data integrity checks, optimizing both relational (PostgreSQL, MySQL, SQLite) and non-relational data stores.

Web Developer | OwnCloud

April 2021 - July 2022

- Developed and maintained client-facing websites and applications using Odoo and WordPress, optimizing performance, security, and scalability.
- Built and managed a comprehensive school management system, improving administrative efficiency and user experience that was. This was done on a system that was 70% APIs.
- Collaborated with multidisciplinary teams to design and deliver innovative technology solutions for diverse business requirements.
- Documented system functionality and performed regular software updates, upgrades, and troubleshooting.
- Supported the integration and optimization of new and existing systems, contributing to overall process and service improvement.

EDUCATION

Bachelor of Science in Computer Science

St. Paul's University | January 2016 - August 2020

Diploma in Computer Science

St. Paul's University | January 2015 - August 2015

CERTIFICATIONS

100 Days of Code: The Complete Python Bootcamp

Udemy | March 2023 - January 2024

- **Skills:** NumPy, Pandas, Tkinter, JSON, APIs, Flask, SQLite, PostgreSQL, Web Scraping, Data Visualization
- **Repository:** <https://github.com/nipsalvin/udemy-100DaysOfCode>
- **Certificate:** <https://www.udemy.com/certificate/UC-b02f91c6-edd5-4153-910b-cdb4567b3842/>

Python Django - The Practical Guide

Udemy | February 2024 - August 2024

- **Skills:** Advanced Django Framework Development, AWS S3, EC2, Elastic Beanstalk
- **Repository:** https://github.com/nipsalvin/Python_Django-The_Practical_Guide
- **Certificate:** <https://www.udemy.com/certificate/UC-24713ce5-1e8e-47f6-9bf9-411164224625/>

Web Development Bootcamp

Udemy | September 2024 - Present

- **Skills:** HTML, CSS, JavaScript, jQuery, Node.js, Express.js, OAuth, React.js, DApp, DeFi
- **Repository:** <https://github.com/nipsalvin/Web-Development-Bootcamp>
